R2Gas Workshop: Biomethane - The most evident renewable fuel today

When: 24th April, 2024

Where: [Haus der Ingenieure](#), **Businesssebene**
(House of Engineers, Business Level), Vienna, Austria

[Program & Registration](#)

R2Gas Workshop: Biomethane – The most evident renewable fuel today

Vienna, 24th April 2024, 09:00 to 17:00

No doubt, the production of biomethane is impressively increasing and has reached 4.2 bcm in Europe by the end of 2022. According to the target of the “Fitfor55” program, the production should reach 35bcm by 2030. However, there are still a few hurdles to overcome. Since the shock in 2021/22 the natural gas prices have come down and are again below the costs of biomethane production. Stakeholders are challenged to optimize the investment and operational costs and utilize all possibilities for monetizing the green value of the product.

During the Workshop of [R2Gas](#) experienced executives from leading project

developers, renewable gas grid operators, registries, the EC and research institutions will discuss the status of biogas upgrading as well as the market opportunities of all renewable gases.

Venue:

[Haus der Ingenieure, Businesssebene \(House of Engineers, Business Level\)](#)

Eschenbachgasse 9. 1010 Vienna, Austria

The building is located in the heart of Vienna, next to the Academy of Fine Arts (Akademie der bildenden Künste Wien) and Schiller Park, it is best reachable by U-Bahn (U2 Station Museumsquartier).

Language: English
